Sir:

Supplemental to the Information Disclosure Statement filed on December

The references were cited on the International Search Report dated November 19, 2001, a copy of which is also enclosed. Please note that several of the references have already been disclosed in the previous Information Disclosure Statement dated December 19, 2001 and therefore have not been listed herein or included on the enclosed PTO Form 1449 form.

4. Thomson et al. "Are dendritic cells the key to liver transplant tolerance?" Immunology Today, Vol. 20, No. 1, pp.27-32, Jan. 1999.

Identification of the above-listed references is not to be construed as an admission of the Applicants or the attorneys of the Applicants that such references are

available as "prior art" against the subject application.

Applicants respectfully request that the Examiner review the foregoing references and that the references be made of record in the file history of the above-mentioned application.

Because this submission occurs before the mailing date of a first Office Action on the merits for the above-referenced application and because Applicants have not known about the references for more than three months, Applicants believe that there is no fee required for this submission. However, please charge any additional fees to Deposit Account No. 02-4377. A duplicate of this sheet is enclosed.

Respectfully submitted,
